We are proud to represent the EDA University Center program at the University of Texas at Tyler as we serve the amazing communities throughout our vast 14 county region.

Mission

The East Texas Entrepreneurship Center's primary mission is to improve economic development through robust entrepreneurship and innovation programs. We promote the simple philosophy that "Improving Economies Improve Lives."

Program

Our targeted areas are economic development, entrepreneurship, technology commercialization, and business research and analysis. We support all disciplines at UT Tyler as well as entrepreneurs and innovators outside the university. We offer cross disciplinary academic and entrepreneurial programs and the industry expertise necessary to bring new product ideas to the marketplace. Additionally, we actively seek opportunities that will create and strengthen existing and emerging innovation clusters. Our developing business incubator will provide mentoring and funding opportunities that will be the first of its kind in the region. It will provide much sought-after help en-suring viable new ventures accelerate and scale more quickly.

Mentoring

Our center plays an important role in developing professional networks to aid in the success of business opportunities. To that end we are building a strong venture mentoring program that will bolster new and existing ventures at the university and in the community. With the help of our mentors we actively pen-

etrate our diverse business ecosystem at different phases of the business lifecycle from ideation, validation, launch and scale of both lifestyle concerns and scalable ventures.

Research

Through the UT Tyler Hibbs Institute, we generate business research and data analytics resulting in a variety of economic impact studies to serve as a resource for local and state government as they make resource planning decisions. Our business community utilizes this service to help determine new venture launch, scale, or relocate decisions.

Partners

We work with our partners in the Small Business Development Centers (SBDC) to ensure firms understand the resources available to them in the form of SBA backed loans and other financial literacy projects. We also value our relationships with the EDA, the State of Texas and other institutions that have helped underwrite many of our efforts. Our extensive partnerships with business leaders and investors are essential to the economic development of the region. We actively seek mutually beneficial relationships with municipal and regional organizations like the Chamber of Commerce, Economic Development Centers, East Texas Council of Governors, Junior Achievement, and others as they are a key part of our success.
